## SUMMARY

Results-driven Full Stack Developer with 4+ years of experience designing, developing, and deploying secure, high-performance enterprise applications using **Java, Spring Boot, React.js, Node.js, and AWS**. Experienced in microservices architecture, RESTful APIs, and cloud-native deployments with Docker, Kubernetes, Jenkins, and GitHub Actions. Adept in optimizing performance, building reusable components, and automating workflows through AI and low-code platforms like **Unqork** and **UiPath**. Strong foundation in Agile/Scrum, DevOps, and end-to-end product delivery.

## EXPERIENCE

### Software Engineer

Persistent Systems, Pune, India

Feb 2022 – Nov 2023

- Built scalable onboarding platforms for Chubb Insurance using Java, Spring Boot, React.js, and REST APIs.
- Integrated event-driven microservices with Kafka & RabbitMQ, handling 500+ API calls/min for reliable communication.
- Developed Unqork workflows and AI-powered chatbots (Kore.AI) to automate 40% of support interactions.
- Deployed apps on AWS (EC2, S3, RDS) with Docker, Kubernetes, Jenkins, and GitHub Actions, ensuring 99.9% uptime.
- Collaborated in Agile sprints and performed peer reviews to ensure code quality, security, and scalability.

### Software Developer

BlankBot Technologies, Bengaluru, India

Oct 2019 – Jan 2022

- Designed full-stack web apps using Java, Spring Boot, React.js, and Bootstrap following OOP principles.
- Optimized backend queries across MySQL, Oracle, and PostgreSQL, reducing query response times by 30%.
- Built reusable React components and modular APIs, improving maintainability and reducing dev time.
- Managed AWS deployments with CI/CD pipelines and Docker for scalable cloud delivery.
- Mentored junior developers and improved team productivity with standardization and documentation.
